Profile

Inspired, resourceful, and tenacious Software Engineer with leadership experience. Adept at anticipating needs, making connections, and orchestrating the parts of the whole. Passionate about bringing up the next generation of technology users and innovators. Always excited to learn new things and to help others grow.

Skills

MERN • MongoDB • Express • React • Node • Javascript • CSS • HTML • Wordpress • Squarespace

Professional Experience

Software Engineer, *100Devs*
- Work with a team of developers to complete responsive MERN web applications for clients.
- Incorporate agile methodologies (i.e. SCRUM) to create innovative solutions to challenging problems through iterative design thinking processes, principles, and tools.
- As early member, help build the agency by writing tutorials, blog writing, organize and share resources, and more.

Full Stack Developer, *KatieMarie*
- Build web and mobile apps for clients with scalability, reliability, availability, efficiency, and manageability in mind.
- Full, personalized design and development with strong client partnerships.
- With Global Tree Alliance, designed and built site that helped gather nearly 10k petition signatures, and became the home of the longest-running Clubhouse for a cause.

Website Manager and Content Editor, *National Organization for Women, Seattle* ↗
- Launched, and currently lead the "That Can't Be True" weekly feature, growing and deepening young volunteer engagement.
- Site redesign and ongoing maintenance, updates, board meetings, and committee coordination.

Full Stack Developer, *FLIK* ↗
- Helped female founders grow their startups.
- App building, web design and development, writing, social media, and a little of everything.

Education

Computer Science AAS-T, *Seattle Central, 4.0 GPA*
- Part time student (ongoing) while gaining real world experience.

Algebra, Writing, Computer Apps and IT, *Arizona State University, 4.0 GPA*
